Hikvision DS-7108HGHI-M1/T 08 Channel (Two -way Audio) DVR

180.00 SAR ✓ In Stock

FEATURES :

- Model: DS-7108HGHI-M1/T
- Up to 10-ch IP
- Camera Inputs (up to 5MP)
- Up to 1080p Lite
- Max. 1080p25 HDTVI Signal

Specification

Video Channels & Hybrid Input:	It natively supports 8 analog BNC channels (compatible with HDTVI, AHD, HDCVI, and CVBS). It can also expand by adding 2 IP cameras (up to 10 channels in total if you substitute analog channels) supporting resolutions up to 5MP.
Two-Way Audio & Audio Over Coax:	The system supports Audio over Coaxial cable for all 8 channels (via HD-TVI signals), allowing the camera to transmit both audio and video over a single wire. For two-way audio
Video Encoding & Display:	It features a maximum encoding capability of 1080p Lite or 720p Lite at 15fps. It provides concurrent Full HD HDMI and VGA outputs supporting up to 1920 × 1080 resolution at 60Hz.
Smart Compression:	It utilizes H.265 Pro+ video compression, which dramatically optimizes data usage, reducing bandwidth and saving up to 75% more storage space compared to older H.264 configurations.
Motion Detection 2.0:	It includes deep learning-based Motion Detection 2.0 across all analog channels. This allows the system to accurately classify human and vehicle targets, significantly minimizing false alarms caused by trees, rain, or animals.
Storage & Network:	Equipped with 1 SATA interface supporting an internal hard drive up to 4 TB. It connects to networks via a 10/100 Mbps self-adaptive Ethernet interface.
