Verbex VT-LPS116 16 Channel Power Timing Sequencer

1,000.00 SAR ✗ Out of Stock

FEATURES :

- 16-channel intelligent power timing control
- Professional power management solution for PA systems
- Supports remote triggering through 24V DC signal
- Sequential startup and shutdown for equipment safety
- Reduces electrical surge and inrush current
- Protects amplifiers and audio equipment from damage
- Heavy-duty power handling capability
- Rack-mount professional design
- Suitable for commercial and industrial audio systems
- Stable and reliable power distribution system

Verbex VT-LPS116 16 Channel Power Timing Sequencer

Brand & Model	Verbex VT-LPS116
Product Category	Professional Intelligent Power Timing Sequencer
Channel Capacity	16 independent channels
Control Logic	Sequential Time-Delayed Startup & Shutdown
Remote Triggering	Supports external automated triggering via 24V DC Signal
System Compatibility	Designed for multi-amplifier commercial PA and stadium rack setups
Front Panel Interface	Channel status LEDs and manual override operational toggles
Auxiliary SocketsDedicated always-on Utility Power Socket for testing/maintenance gear	Dedicated always-on Utility Power Socket for testing/maintenance gear
Primary Protection	Reduces electrical surge and down-line inrush current stress
